As members of the **Sustainable Packaging Coalition®**, we are an approved printer of the **How2Recycle®** label, a label system which highlights a universal recycling language. By showcasing this label, brand owners who've opted to join the cause of diverting materials from the landfill can educate consumers on designated and proper recycling strategies.

Gentle Fresh Apple Solutions

"The FSPB2 is a tremendously versatile machine that does not require proprietary packaging. Coupled with high-performance Newtec weighers, our pouch bagger delivers a solution to nearly any commodity type."

Aaron Fox
President of Fox Solutions

Unique soft-fill feature that permits commodities like apples to be packed at speeds up to **18 bags per minute**.

The footprint of the machine accommodates packinghouses of all sizes.

The **FSDSPB** offers accuracy, gentle handling, and reasonable speed. A compact version of the **FSPB2**, this dual pouch bagger features a linear packing system that sufficiently packs apples at speeds of up to 14 bags per minute. Without damaging or bruising this sensitive commodity, this equipment innovation fills a gap in the apple industry while reducing the amount of product waste, labor allocated, and removes a significant variable of potential employee injury. This solutions offers a sanitary alternative to hand packing and an increase in your operational growth and distribution rates.
